**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to the use of a plurality of buffers each in a one to one correspondence with a plurality of banks, for buffering data from those banks, classified in class 710, subclass 53.
  - II. Claims 16-27, drawn to buffering a bank of Flash memory using a single buffer circuit, classified in class 711, subclass 103.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use without Flash memory. Invention II has separate utility such as the need for only one buffer. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have now acquired a separate status in the art as shown by their different classification and because the search required for Group I is not required for Group II, and vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 2186

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
